

At the Armadale Veterinary Hospital, we are focused on trying to improve the health of all pets. The best way to do this is through prevention. We have therefore developed a couple of community focused programs to make it easy and cost effective to take the best possible care of your pet from day one. We have also reduced the cost significantly on these two offers to try to improve our local pets lives.

One of the issues that we unfortunately see too much of in Australia are cases of preventable diseases such as Parvovirus, which kills many young dogs. We want to increase the vaccination compliance within our local community to ensure that the cases we have seen already this year are not repeated. Within both the **Vaccination4Life** program vaccinations are included at a considerable discount.

We are all pet lovers and, as a result, want to try to promote excellent pet health within our community. We are always trying to think of new ways to make life easier for our patients and our patients owners! With this in mind we have created a website where you can ask questions and receive basic pet care advice.

Visit armadalevethospital.com.au and ask away! Our clinic is also open 6 days a week.

If you have any questions then please call our team at Armadale Veterinary Hospital on 7037 8707.

Vaccination4Life™

A FEW FACTS TO KNOW

Vaccinating your pets is extremely important when it comes to the health of your pets. Vaccinations build immunity and protect your pet from serious diseases. Although vaccinations are the best option to protect your beloved pet, the expense can become a deterrent. For this reason, we have developed the Vaccination4Life initiative to help save you money and simultaneously provide your pet with the care they need.

Our Vaccination4Life initiative is designed to enable pet owners to provide the best care for their pets and help save them money.

Your pet is in caring hands

Vaccination4Life™

A lifetime pet vaccination plan where your pet receives annual boosters and health checks for life!

Vaccination4Life

Vaccination4Life is a lifetime vaccination plan where a one-off payment will provide your pet with annual boosters and annual health checks for the rest of their life. There are no hidden costs. You simply make a one-off payment and you can rest easy knowing your pet will be protected for the duration of their life.

Annual vaccinations and health checks for life.

We created Vaccination4Life because so many people stop vaccinating their pets mid way through their life. As a result, we still see many infections in puppies and kittens that could be prevented. Most of these diseases, like parvovirus, tragically kill many pets each year.

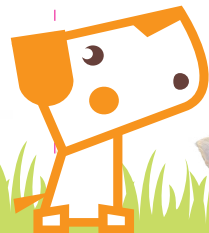

Vaccination4Life is a lifetime vaccination plan that saves you up to 75%.

This initiative is our attempt to try to improve the vaccination status of pets in our local area. Please help us promote **Vaccination4Life** to the community so that we can reduce the risk to pets in our local area.

Our aim is to improve the health and wellbeing of all animals within our community!

Vaccinating your pet is vital to keeping them happy and healthy.

What vaccines are Included?

- C5 Vaccine for Dogs including; Canine Distemper Virus, Infectious Canine Hepatitis, Canine Parvovirus, Canine Adenovirus, Canine Parainfluenza and Bordetella Bronchiseptica (Canine Cough or otherwise known as Kennel Cough).
- F3 Vaccine for Cats including; Feline Rhinotracheitis Virus, Calicivirus, Panleucopenia Virus and Chlamydia Psittaci (not included in the F3 combination).

Who Is eligible for Vaccination4Life?

For this program to be financially beneficial we recommend all pets under 7 years of age are eligible for **Vaccination4Life**.

Terms and Conditions:

- **Vaccination4Life** can be purchased prior to vaccination.
- Payment cannot be made in installments and must be completed at time of vaccination.
- Pets must be microchipped as part of this program.
- Core Vaccines are included as per the program. For Cats this is the F3 vaccine and for Dogs this is the C5 vaccine, which includes Kennel Cough.
- Does not include Leptospirosis and Coronavirus Vaccination and Rabies vaccination for dogs, nor the FIV vaccination for cats.
- Vaccines will be given in the frequency as directed by the World Small Animal Veterinary Association Guidelines (Vaccinations more frequently than once per year will not be given, as this is not recommended).
- If a pet is deemed too sick for a vaccination by the Veterinarian then a consultation fee may be charged and treatment may be prescribed. These will incur a separate cost. In such a case, the Vaccination will be postponed to a date following the pets recovery.
- There may be occasions, where depending on the personal circumstances of yourself and your pet, non core vaccines would be recommended, but they are not included in this program.
